

# Thanks.

To all of you who have dared to march to the beat of a different drummer since Global Marine introduced offshore turnkey drilling in 1979, thank you.

Now that virtually every operator has jumped on the turnkey bandwagon to expand their drilling capabilities, manage costs and control risks, we haven't forgotten that you entrusted your wells and your drilling

commitments to us long before the current drilling boom.

And to all those operators who work in harmony with our drilling teams every day, we thank you. Because of you, our track record is the envy of the industry with more than 400 wells successfully drilled worldwide.

To our valued clients, who've helped us keep a step ahead of the competition to become the world leader in turnkey drilling, we are grateful. We'll strive to earn your respect and business every day. Thanks again.

Global Marine
