

HERE

Ample dock space available - 40' deep on a 350' channel.

NOW

Quality-conscious - <2% weld reject rate; no LTAs in 1996.

HAM

Engineers ■ Constructors ■ Fabricators.

At a time when 97% of capable rigs are contracted, shouldn't you contract with a shipyard that's 100% ready? We're HAM Marine, Inc., and we've been earning a reputation for quality, safety and management know-how for over 15 years. Now, drawing from our own extensive knowledge as well as from an outstanding labor pool, we're building on that reputation with projects for several major drilling contractors. But that doesn't mean we're too busy to bid on yours.
