

### **AGGREKO'S CHARLEY ROYCE TO SPEAK ON BENEFITS OF NATURAL GAS GENERATORS AT NEW YORK BUILD 2016**

NEW YORK – Lower emissions and fuel cost savings, are among the benefits of using generators powered by natural gas, says Aggreko's Charley Royce, one of the speakers at the New York Build 2016 expo.

Aggreko, the world leader in modular, mobile power and temperature control solutions, is seeing an increase in the number of commercial construction customers using mobile generators, including those powered by natural gas.

Royce, vice president of Building Services and Construction at Aggreko, said: "We have seen an increase in our customers' willingness to leverage temporary utilities, such as mobile generators powered by natural gas, due to their ability to lower emissions and capital expenditures. I look forward to discussing how builders can safely and economically use modular, mobile power at every phase of a building's existence from design and site preparation to construction to maintenance thereafter."

New York Build 2016 will take place on Mar. 7-8, at the Javits Center in New York, NY. Royce is scheduled to speak on Mar. 7 from 12:00 p.m. - 12:30 p.m. in the main conference room. Aggreko will also be exhibiting at the industry event in booth number C2.

The expo brings together leading contractors, developers, planners, engineers, architects and many more key stakeholders to discuss the latest investment opportunities, developments plans and milestones for construction in New York City and New York State. For more information, visit:

## EDITOR'S NOTES

Aggreko plc is the leading global provider of modular, mobile power and adjacent product solutions. Aggreko employs more than 6,000 people operating from 211 locations. In 2014 we served customers in about 100 countries, and had revenues of approximately GBP 1.6bn (USD 2.6bn or Euros 2.0bn). Aggreko plc is listed on the London Stock Exchange (AGK.L) and is headquartered in Scotland.

Aggreko is comprised of two business units: Rental Solutions and Power Solutions.

In the Rental Solutions business, we operate in developed markets and develop solutions for, and hire our equipment to, customers who then operate it for themselves, although we retain responsibility for servicing and maintaining it. We operate across all sectors in the market, but are heavily involved in oil and gas, petrochemical and refining, mining and events.

In the Power Solutions business, we operate in emerging markets as a power producer. We install and operate modular, mobile [power plants](#) for both utility and industrial customers and we charge both for providing the generating capacity, and for the electricity we produce. In our Industrial business, as in Rental Solutions, we are market leaders in oil and gas, petrochemical and refining and mining, whilst our utility business helps countries solve their power shortages.

We design and manufacture equipment specifically for these requirements in our factory in Dumbarton, Scotland.
